## Earth Science Phenomenon: Video / Time Lapse Project - Written Component

For each video, you must submit a written component to provide information about your project.

The written component must be typed and must fit on 1 sheet of paper. (Front and Back) Minimum font size = 12 pts.

The written component must include name(s), student number(s), class period(s) and date of submission.

The written component will have 4 parts (A - D). **Label each section clearly.** Each part is worth one point.

Updated  
10/29/17

- Part A - Description of Earth Science Phenomenon - one or more paragraphs.
- Part B - Identification and Definition of Essential Terms for discussing the Phenomenon.  
List with terms underlined and in **bold** font.
- Part C - Explanation / Model that explains the captured Phenomenon.  
(1 or more paragraphs. Better with a diagram(s))
- Part D - Further Questions to consider or videos to make based on the Phenomenon.  
(Text with bulleted or numbered list) May include suggestions for additional videos.

**Each part will be graded based on the following scale of points**

Points	Description of Characteristics
1	Typed, Well written, Complete, Grammatically correct, Scientifically correct, Well formatted, Easy to read and follow. Outstanding example. One or more paragraphs (A & C)
0.75	Typed, Well written, some minor content or grammatical errors, scientifically correct, well formatted. Some minor information omitted. Good example.
0.5	Section is untyped, major content/grammatical errors, omissions, contains scientific inaccuracies, poorly worded, difficult to follow. Poorly formatted. Fair example.
0.25	Very difficult to follow or understand. Poorly formatted. Major content, grammatical, and scientific errors. Significant omissions. Poor example. Contains only 1 term or sentence.
0	Missing or not submitted, Incomprehensible, Highly inaccurate. Unacceptable example.
